Conceria PRIANTE

Authentic

L'autenticità è qualcosa che riguarda la vera essenza delle cose, potremmo anche definirla come una melodia interiore, come una sorta di imprinting dell'anima che rappresenta la parte più vera di ogni individuo.

Essere autentici vuol dire esprimere la propria vera essenza nel modo più spontaneo e naturale possibile ed è proprio da questo desiderio espressivo che nasce la nostra collezione “AUTHENTIC”.

I nuovi articoli che vi proponiamo raccontano la PELLE, che torna protagonista nelle sue varie declinazioni. Partendo dalla tradizione italiana della lavorazione del cuoio e grazie alle nuove tecnologie applicate, la materia si esprime al meglio con tatti caldi, setosi, mani morbide, rifinizioni naturali.
Troverete lavorazioni artigianali negli articoli asportati o tamponati a mano, così come grane naturali che raccontano la pelle, la sua storia.

Authentic è una collezione VERA, che spazia da articoli classici a transitional e contemporary e vi offre un’ampia gamma di prodotti che esprimono il nostro profondo rispetto per la materia che lavoriamo, senza mai perdere di vista la sostenibilità, pilastro fondamentale su cui da anni basiamo lo sviluppo delle nostre collezioni.

Authenticity is something that concerns the true essence of things, we could also define it as an inner melody, as a kind of soul imprinting that represents the truest part of everyone. Being authentic means expressing one's true essence in the most spontaneous and natural way possible and it is precisely from this expressive desire that our "AUTHENTIC" collection was born.

The new articles we offer tell the story of LEATHER, which returns as the protagonist in its various declinations. Starting from the Italian tradition of leather processing and thanks to

new applied technologies, the material is expressed at its best with warm, silky touches, soft and spongy hands, natural finishings.
You will find craftsmanship in the rub-off or hand stained items, as well as natural grains that tell the story of leather.

Authentic is a GENUINE collection, ranging from classic to transitional and contemporary items and offering you a wide range of products that express our deep respect for the material we work with, without ever losing sight of sustainability, a fundamental pillar on which we have based the development of our collections for years.

Article KL Along

Quando interviene la mano sapiente dell'uomo la magia si compie: la materia prende forma, diviene unica.
Ed è proprio l'unicità la caratteristica principale di questo pellame semi-anilina, grana naturale, dal tatto setoso, dove la lavorazione artigianale dona alla pelle il look inconfondibile di un asportato a mano.
KL Along è un pellame molto morbido che esalta appieno le caratteristiche naturali della pelle; è la scelta ideale per chi cerca un articolo esclusivo, unico.

When the wise hand of man intervenes, the magic is accomplished: the material takes shape, becomes unique.
And uniqueness is precisely the main feature of this semi-aniline, natural-grain leather with a silky touch, where craftsmanship gives the article the unmistakable look of a rub-off item.
KL Along is a very soft article that fully enhances the natural characteristics of leather; it is the ideal choice for those looking for an exclusive, unique item.

Tear Strength – single edge	EN ISO 3377-1	N	≥ 20
Tensile Strenght	EN ISO 3376	N/mm^2	≥ 10
Colour fastness to Water Spotting	EN ISO 15700	Grey scale	≥ 3
pH and Δ pH	EN ISO 4045	Min 3,2 - if pH ≤ 4 Δ pH ≤ 0,7	Pass
Burning Behaviour to cigarette and match flame	BS 5852:1979	BS 5852:1979	Pass
Chemical Characteristic	Article processed in conformity with Reach regulation		

LEATHER FEATURES AND CARE

Characteristics not presented in this document are not applicable or not defined by producer. Additional requirements have to be specified by Customer before purchasing order. Results of tested characteristics are an average of results found on standard productions. Eco and Environmental safety conformity to CE 1907/2006 REACH is assured till shipment. In case of further chemical treatments, it is customer responsibility verify chemical compatibility and that used chemicals would not impact on conformity of the leather. Conceria Priante srl will not respond legally in case of missed indications checking.

Hides have to be worked maintaining an internal humidity of 10-12% and using process temperature not higher than 60°C/140°F to avoid changing on their mechanical properties and aspect. Do not put over weights on hides during stock, same goes for finished furniture. Stock hides in dry ambient with temperature 15/40°C - 59/104°F. Avoid to use any solvent or lotion because they could weaken finishing adhesion. Heat guns, shrink wrapping and any other source of heat must be avoided. Nature/growth features, colour/structure differences are indications of genuineness (visible/clearly visible). Cuts and seam patterns differing from material processing are normal. The initial leather smell is typical of the material. Colour and structure differences compared with the sample furniture and leather specimens are possible. To maintain the initial characteristics of goods produced with our articles, it is recommended to follow these instructions: keep them in dry ambient at room temperature. Keep leather away from direct sunlight and from any sources of heat to avoid colour change and darkening. Use only recommended leather cleaner and protector products. Totally avoid multi-purpose cleaning products. Before using cleaning product, try it on an hidden surface.Clean stains as fast as possible; beverage stains could be removed dabbing with blotting paper without rubbing, then pass gently a white wet cloth on the stain, from external to internal side. After drying, polish it with a soft dry cloth. Fully clean and re-protect your leather furniture every six months.
